Cindy Beeler raised the question of whether or not we should propose a phased implementation/compliance date for the FIP to reasonably accommodate all of the retrofit and installation of control equipment that would be required for 3,000+ existing sources. I spoke with UDAQ to see when they require compliance with the site-specific AOs for existing sources and for new sources under the GAO or AOs. I'd like to get your opinions and see what you would like to move forward with.
